**Oxyplus 250**

**Oxyplus 1000**

**Oxyplus 10000**

**Industrial Reverse Osmosis Plant**

**Ranges :** 250-10000 LPH.

Specially designed reverse osmosis plant for schools, offices, factories and Institutions.

- Hotels, Restaurants, Food and Beverage Industry, Ice Factories.
- Centralized RO plant suitable for Flats, Villas, Bangalows And Apartments Industrial Houses.
- Pharmaceutical & Chemical Industry.
- Customized models are available in various capacities.

**Advantages:**

- Fully stainless steel construction for high strength & durability.
- Available in Semi automatic and fully automatic operation.
- Miro processor based control panel for accurate operation.
- Available with LCD display for monitoring the readings.
- Excellent service support from experienced engineers.

**Oxyplus Water Treatment Plant**

Commercial filtration system for Industries, Apartments, Hotels, Institutions and Community Centre.

- Removes suspended impurities and delivers clear water.
- Reduces the odour in the water.
- Reduces the hardness in the water and gives soft water.
- **Available in :** 1000-25000 LPH flow range.
- **Material of construction:** FRP, MS and SS.

**Oxyplus Mineral Water Plant**

**Oxyplus Water Treatment Plant**

**Oxyplus UV 500**

- Commercial high flow ultra violet ray sterilizer.
- Suitable for water coolers and multiple outlets.
- Ensures high sterilized water.
- Provided with micron filter and activated carbon filter.
- Suitable for schools, industries & commercial establishments.

**Oxyplus Industrial UV**

**OUR CERTIFICATES**

Oxyplus Crystal

Oxyplus Deluxe

## Oxyplus RO

**Ozone Technologies** brings you state of art reverse osmosis water purification system with active multistage filtration to remove physical impurities, odour, unwanted excess salt, bacterial and viral contaminants present in the water and gives us rich, pure & tasty drinking water.

**Oxyplus** RO comes with advanced RO+UF + UV purification and with EMS Technology which ensures natural mineral in the water.

### Oxyplus RO Features

Converts salt water into pure drinking water.

7 stage process with advanced EMS Technology.

100 percent chemical and pesticide free.

Reduce hardness and eliminates harmful bacteria and viruses.

**Oxyplus** RO water purifier today and protect your family from water borne diseases, for ever.

Oxyplus Under Sink

## Oxyplus UV

**Oxyplus** UV comes with state of art advanced ultra violet purification system with dual UV chamber and multi-stage filtration to remove physical impurities, odour, unwanted excess bacterial and viral contaminants present in the water and gives us rich, pure & tasty drinking water.

### Oxyplus UV features

Three Stage active filtration.

Dual UV chamber to ensure pure drinking water.

Oxyplus UV

Oxyplus Elegance

## Oxyplus Water Softner

**Ozone Technologies** brings you **Oxyplus** SOFTA water softner system with world class Ion Exchange Process which brings down the hardness content (Calcium & Magnesium) in the water. The cation resins used in the softner which acts an exchange point and it converts calcium & magnesium ions into sodium ions as and makes the water soft.

Soft water is gentle to skin and hair.

Reduces plumbing problems and keeps the fittings clean.

Prevents scale deposits on utensils.

Increases life of fabric.

Oxyplus Softner & Iron Removal Vessels

## Oxyplus Iron Removal Plant

**Ozone Technologies** brings you **Oxyplus** iron removal plant with **Oxyplus** formulated technology for effective filtration of iron and it eliminates all suspended impurities, odour in the water and keeps your clothes, tiles stain free. This system is cost effective and user friendly. Life of this system is very high comparing to other methods.

Removes the iron content in the water and makes it clear.

Reduces the odour in the water.

Reduces the stain formations in the Gyessers, washing machine and Sanitary Fittings.

## Oxyplus Filtra

**OzoneTechnologies** presents **Oxyplus** filtra with state of art reverse osmosis filtration with advanced UV+Ozone purification and in-built cold, hot and warm water.

Advanced triple purification process.

Stainless steel body to ensure high strength & durability.

Stainless steel tank for cold and warm water .

Available in various capacities.

RO+UV+Ozone with EMS technology.

Dispenses Hot, Cold and Normal water from one machine.

## Oxyplus Water factory

**Ozone Technologies** presents **Oxyplus** water factory an advanced commercial reverse osmosis filtration with UV+Ozone purification and in-built cold, hot and warm water.

Mass storage model designed for commercial application

Advanced design with fully automatic operation.

Suitable for Educational Institutions, Industries, Hotels and Commercial establishments.

Available in various capacities.

Dispenses Hot, Cold and Normal water from one machine.
